

SERIE BD210

ISTRUZIONI DI MONTAGGIO / ASSEMBLY INSTRUCTIONS

01	Vetro/Glass
02	Corpo cerniera/Hinge body
03	Guarnizioni/Gaskets
04	Tacca/Cut-out
05	Guarnizione interna/inner gasket
06	Piastra/Cover
07	Vite/Screws

1) Alloggiare il corpo cerniera, compreso di guarnizioni nella tacca sagomata del vetro.

1) Insert the hinge with the gasket in the shaped cut-out of glass panel

2) Per evitare scivolamenti della porta, per mezzo della guarnizione interna e/o di materiali morbidi (pvc, gomma, ecc) o colando adesivo termofusibile, riempire gli spazi tra tacca vetro e corpo sagomato. Il peso del vetro deve gravare sul corpo cerniera e non essere sostenuto dalla pressione del coperchio.

2) To prevent the door slipping, fill the hollow space between the glass cut-out and the shaped hinge body with the inner gasket and/or soft material (e.g. rubber, pvc) or pouring hot melt adhesive. The weight of the glass panel must be supported by the hinge body, not beard by the cover pressure.

3) Appoggiare la guarnizione del coperchio al vetro.

3) Position the cover gasket against the glass

4) Avvitare la piastra al corpo tramite le viti di fissaggio.

4) Set the cover onto the hinge using the fixing screws

REGOLAZIONE DELLA CERNIERA

4) Svitare i grani per il libero movimento della cerniera

4) Untighten the grub screws for the free movement of the hinge

5) Collocare la cerniera nella posizione desiderata

5) Place the hinge in the desired position

6) Avvitare i grani nella posizione finale.

6) Tighten grub screw in the final position.
